

# REALEDGE

WHERE ENGINEERING MEETS DIGITALIZATION.

REALEDGE is a next-generation, all-in-one platform that merges CAD, PLM, XR, and digital twin technologies into a unified, collaborative ecosystem—empowering anyone to create immersive, interactive experiences without complex toolchains or coding.

## KEY FEATURES

### Native PLM/CAD Import with Automatic Optimization

Import complex engineering and design data directly from PLM and CAD systems. **REALEDGE automatically optimizes heavy models** for seamless performance across devices.

### AI-Powered Interaction Creator

Instantly generate interactive 3D experiences from your PLM/CAD data — without writing code. REALEDGE analyzes your model and creates contextual behaviors, **reducing production time and cost by up to 90%**.

### Real-Time Collaboration

Engage with teams and stakeholders across locations. All changes and feedback happen live, inside the shared 3D space.

### Cross-Platform Support

Deploy your experience across desktop, mobile, web, and XR devices — effortlessly.

### Scalable & Secure

Built on an enterprise-ready foundation, ensuring reliability, performance, and data protection.

## WHY REALEDGE?

Automatically turn CAD data into interactive content

Eliminate manual setup

Future-ready and secure infrastructure

Collaborate and review in real time

Reduce time-to-deployment by up to 90%

## USE CASES

- AUTOMOTIVE MANUFACTURING
- AEROSPACE & DEFENSE
- HEAVY MACHINERY & EQUIPMENT
- CONSTRUCTION & INFRASTRUCTURE
- OIL & GAS
- CONSUMER ELECTRONICS
- RAILWAYS & TRANSPORTATION
- SHIPBUILDING & MARINE
- ENGINEERING
- SMART FACTORIES / INDUSTRY 4.0
- ENERGY & UTILITIES
- WAREHOUSING & LOGISTICS
- MINING & MATERIAL HANDLING
